

Two bend - separate bends

The diagram below shows the approximate position of the curtain pole or rail in your bay window. Please let us know if this is not how you expected the rail to be positioned.

We now need all the measurements. Please complete the tables below.

| Measurements in CM | | Cross measurements in CM | |
|--------------------|----------------------|--------------------------|----------------------|
| A - B | <input type="text"/> | C - D | <input type="text"/> |
| B - C | <input type="text"/> | A - C | <input type="text"/> |
| | | A - D | <input type="text"/> |

Please confirm where you have taken the measurements from by ticking below:-

- From the wall or window frame to which the back of the brackets will fix.
- From where the actual pole or rail is required to be.
(Please make sure you have made allowances for brackets to fix behind the pole or rail. The bracket projection is given on our website and is the distance from the back of the bracket to the front of the pole or rail)

Do the measurements include finials (if pole), (tick 1 box)

Important Information

- Custom bent curtain rails take from five to fifteen working days from ordering to delivery.
- Please note that errors made on this form could mean your bay rail being incorrect.
- We are unfortunately unable to exchange or refund bay rails.
- Please take all wall measurements at rail height.
- Larger bay window rails may have to be made in two pieces joined in the centre.
- When measuring your bay please use a suitable metal tape and ensure that you have help - accuracy is the key.
- Please consider the diameter and suitability of your rail when planning your curtains.
